Figure - 6

The drawing consists of two parts: a perspective view on the left and a cross-sectional view on the right.

Perspective View (Left): Shows a rectangular assembly. At the top is a horizontal bar with a series of small rectangular protrusions along its top edge. Below this bar is a large rectangular block. A diagonal member crosses the front face of this block. The entire assembly sits on a base consisting of several horizontal layers.

Cross-sectional View (Right): Shows a vertical section of the assembly. At the top, a horizontal member (labeled 1) is shown in cross-section. Below it, a vertical member (labeled 37) is shown. A diagonal member (labeled 31) is shown in cross-section, intersecting the vertical member. A small circular feature (labeled 7) is visible on the vertical member. A horizontal member (labeled 35) is shown at the bottom of the cross-section. The entire assembly is supported by a base (labeled 41). A label 43 points to the base of the perspective view.
